

<p><i>RP's report:</i>  RP has completed delivery of newsletters and thermometers. PO is very busy at the moment. Feels it worthwhile continuing at least over the Xmas period. The IR surveys are almost completed. RP has asked them to redo SK's house without the lights. People have commented about the Church floodlight which appears to be on continuously. SK suggested a timer on the "feature lighting" and a movement sensor on the security light. RP to talk with Steve Legge. RP has entered the yoof market with a facebook page "Southern Electric Meter" and a twitter id "SE_MeterMan_Rob". GF reminded the group that Corrie James is coming to visit to report on the project for SE and the government. SK reported that Andrew and Alison were videoed for an internal SE report.</p> <p><i>Report from RC:</i>  9.78% saved in November. This works out to roughly 1kWh per household per week (a single unit) which needs to be saved to reach 10%. The new graphs are on the display. JL pointed out that we had no letter from SE which suggests they are only surveying North Leigh village and not NL parish. The energy advice visit to the MH has been delayed until the new year.</p>	RP
<p><i>Comments on Saturday morning stints:</i>  GF decided that this was not a success.</p>	
<p><i>Calendar update:</i>  LH gave an update on the calendar. It is with the printers waiting a final approval. GF to proof read. Printing should take less than 10 days. To be delivered to SK. The group thanked LH for the work that has been involved.</p>	LH, SK
<p><i>Media Report:</i>  JL reported back on the interview with the FT.  GF reported back from the PC. He reported a negative reaction to his white good scrappage scheme.</p>	
<p><i>Website update:</i>  RP to send a photo of the award to GM for the website.  GM to link to FT article  GF to provide the final instalment of the book review.  JL reported on a radio play she'd heard. The conversation then veered onto cyclists in a shed – quite surreal.</p>	GM, RP
<p><i>"freecycle" board for the memorial hall:</i>  CK wants to know if the group would support the idea. GF doesn't like the idea. That was the end of that.</p>	
<p><i>Memorial Hall energy consumption:</i>  JL reported on dealings with the SE advisor and the MHC. SK and JL to try to talk to MHC before xmas.</p>	JL, SK
<p><i>Allocation of remaining funds:</i>  LH informed the group about "energy efficiency bingo" targeting older citizens as tried in Harrogate.  JL suggested the teapot proposal.  LH suggested a Dr Bike type stall at a future event. LH to try to contact the "bloke in Long Hanborough".</p>	LH

<p><i>A.O.B:</i>  GM reported to the group the offer from Jack FM for a free bouncy Mega Slide for community events. Details available from the Jack FM website. JL reported back from John Richard who is still offering to film a group event.  GF wanted the group opinion on a new “tip of the month” encouraging subdued lighting. GM cautioned against patronising people and that a lot of subdued lighting may well be incandescent rather than CFL. AR to have a think about a way to put it across in the right manner.  Merry Christmas and a Happy New Year</p>	AR
<p><i>Date of next meeting:</i> 14<sup>th</sup> January 2010  SK and AR to report to the PC in January.</p>	SK, AR
